OBJECTIVE

I'm a frontend developer with 3 years of experience in the market, working mainly with React and JavaScript. During my career, I have designed and developed web platforms of varying degrees of difficulty, working under agile methodologies such as Scrum. In addition, I have experience as a mentor in the frontend area with React. I also handle technologies such as Git for version control. My focus is on creating exceptional user experiences and keeping up with the latest trends in web development and venturing into the Backend area to have a general mastery of the development and improve communication with the rest of the team.

SKILLS & ABILITIES

HTML • CSS • Javascript • Typescript • React • Next.js • Styled Components • Tailwind • Material UI • Bootstrap • Responsive design • Axios • REST APIs • Strapi • Git • Github • Gitlab • Agile / Scrum • Jest • Vitest • Storybook • VSCode • Figma • Photoshop • Wireframes and prototypes.

Knowledge in Python • Django • Django Rest Framework • Node • Express • Docker

EXPERIENCE

Knowledge Labs, S.A.P.I. de C.V. - Front End Developer- UX/UI   **04/24 – Present**

México (Remote)

I developed a platform for uploading, handling, controlling and supervising files for the municipality of Culiacán, I worked mainly with React and Tailwind. My activities included API integration with Axios, bug fixing, performance optimization through image optimization and selective component loading, participating in meetings to discuss requirements via Zoom, building and isolated testing of UI components with Storybook and Vitest, and deploying on Netlify.

Tech Stack: React, Tailwind, Axios, VSCode, Git, CSS, Github, Netlify, Storybook, Vitest.

Spiral Media Labs - Front End Developer - UX/UI   **05/22 – 05/23**

México (Remote)

I was responsible for creating a sports betting web application for GoChallenge in Mexico which included an administrative dashboard and the user area for challenging/betting. Use React and Styled Components primarily to build a fast, responsive, and user-friendly interface that works across different devices and browsers. In addition, I was in charge of the layout design, color palette, typography, icons and graphics using tools such as Figma and Photoshop. User research, testing, and feedback sessions guided my design decisions, ensuring an intuitive and engaging experience. Collaborating with backend developers, product managers, and stakeholders.

Tech Stack: React, Styled Components, Axios, VSCode, Git, CSS, Gitlab, Netlify.

Hackademy - Front End Mentor   **01/22 – 08/22**

México (Remote)

I guide aspiring and junior developers in essential skills and tools to build modern, interactive web applications. Providing guidance, feedback, and support on topics such as JavaScript, CSS, Styled Components, React, Git, and Axios. In addition, I helped students with their projects, reviewing their code, suggesting improvements, and sharing my experience as a frontend developer. My goal was to help them gain confidence and competence to create amazing web applications.

Tech Stack: HTML, CSS, React, Styled Components, Axios, VSCode, Git, CSS, Github.

Hackademy - Front End Developer - UX/UI   **06/21 – 08/22**

México (Remote)

I developed and maintained two different web applications. The first helped users manage their resumes (CVs) and link them to relevant vacancies from various companies. The second app functioned as a hub for tech bootcamps, allowing users to explore, compare, and sign up for bootcamps aligned with their interests and goals. Use technologies such as React, Styled Components, JSX, CSS, JavaScript, Bootstrap, Git, Strapi, Axios, and Next.js. In addition, as a UI/UX designer, I focused on visual identity, usability and best practices. Collaborate with backend developers and stakeholders to create valuable and convenient web experiences for users.

Tech Stack: HTML, CSS, React, Styled Components, Axios, VSCode, Git, CSS, Github, Strapi, Next.js

EDUCATION

Design, develop and management of web projects – Caracas, VE   **2018**

ARTS Graphic Computer Institute

I have studied web design, development, and web project management, gaining valuable skills to create and manage websites. Knowledge of HTML, CSS, JavaScript, WordPress, and Drupal allowed me to design attractive and functional websites. In addition, I can optimize website performance, improve user experience, and ensure site security.
